An asset is impaired when the carrying amount of the asset exceeds the recoverable amount. An impairment loss is charged to the statement of profit and loss in the year in which an asset is identified as impaired. When there is an indication that factors that caused an impairment loss to be recognized for an asset in prior accounting periods, no longer exist or that the intensity of impairment loss may have decreased, the impairment loss, to the extent no longer necessary to hold, is reversed.

x) Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/ (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. Cash flows for the year are classified by operating, investing and financing activities.

xi) Earnings per Share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.
